Ornamental Iron
Manufacturers Association

Introductory

THE ORNAMENTAL IRON MANUFACTURERS ASSOCIATION OF SOUTHERN CALIFORNIA take pleasure in presenting their first edition of illustrations representative of Ornamental Iron and Bronze produced by members of the association, which they offer as evidence of the standard, scope and progress of their work ¶ This reference book, of Ornamental Iron designs is a step forward to bring closer co-operation, harmony and understanding between the Architect and the Contractor ¶ It was with a spirit of rendering better service to the building industry that the *Ornamental Iron Manufacturers Association* of Southern California decided to compile in book form various illustrations showing the uses of ornamental iron, as generally specified, by the leading Architects ¶ The illustrations tell a true story; representing the trend of co-ordinating artistic architectural designs with practical uses to obtain strength and durability combined with beauty and value ¶ Ornamental Iron can be substituted for practically every kind of material—but no material can logically be substituted for Ornamental Iron ¶ This fact is never forgotten or over-looked by the Architects who have learned by experience that Ornamental Iron is a wise investment which brings big returns ¶ We shall be pleased to respond promptly to requests for estimates and special designs.
